

Let's learn about how clouds are formed

On the next page you will find a picture of how clouds are formed

how are clouds formed

- The sun warms the air above the surface of the earth.
- When the air is warm, it rises in the sky and forms water droplets
- The water droplets join to form clouds

Let's do a little exercise:

Cut out the pictures on the next page and see if you can show how clouds are formed

Do you know how clouds are formed?
